GENERAL TRADING LLC

ABOUT US

Quality is our greatest priority and inimitability . "Hi-Tech" ensures that all projects are executed under the Highest international standards and rightly identify within us in our quality. The successful completion of projects is our further to proof that our well experienced and highly specialized staffs guarantees unmatched product superiority and complete customer satisfaction. Our People are our best assets.

" TO ACHIEVE CUSTOMER SATISFACTION, TRUST AND CONFIDENCE THROUGH CONTINUES IMPROVEMENT IN QUILTY OF PRODUCTS "

•VISION

To offer our clients the highest quality products and service, adding the experience and innovation that we have developed over decades of commitment to the business.

•MISSION

We understand all our customers are different and their business is Highly demanding and competitive, so we have learnt to work hard to understand and meet the requirements of each customer in his own way.

PRODUCT

Oil Field Equipment

Quality is our greatest priority and inimitability. "Hi-Tech" ensures that all projects are executed under the highest international standards and rightly identify within us in our quality. The successful completion of projects is our further to proof that our well experienced and Highly specialized staffs guarantees unmatched product superiority and complete customer satisfaction. Our People are our best assets.

- Engineering Contractor
- Refining Units
- Power & Water

PRODUCT

ENGINEERING CONTRACTOR

HITECH has extensive experience in the offshore, oil & gas, engineering and construction related industries. Our people have worked on site and at management levels within the industry so we understand the pressures that you work under as well as the importance of providing a service that can be reliably consistent and trusted.

We take tenders of Oil field equipment supply in the MENA region and deliver products at provided deadline for misinterpreted operation and maintain quality of the spares genuinely.

PRODUCT

REFINING UNITS

HITECH provide single-source equipment management, quick supply challenging environmental demands and superior quality control for reliable and cost-effective operations. We've delivered spares for more than 1,400 fully-engineered and pre-fabricated modular Refining units delivered to customers around the world. Our expertise and project execution experience can help you manage and monetize resources more effectively.

Refining units of various scales and various products are being under our scope of equipment supply. We are routinely supplying to our contract basis client in a hassle free that keeps us at their top supplier priority.

PRODUCT

POWER & WATER

Proven reliability, fuel flexibility and low emissions of our equipment range makes the plants suitable for demanding applications in the oil and gas industry, such as processing facilities, pump stations, compressor stations, marine terminals etc.

Our range of equipment covers the spares used while water hauling, water treatment and water cooling process in the oil field. We supply quality equipment and spares as we are aware of the efficiency being the critical factor in the oil field industry.

PRODUCT

Oil Trading

Luckily, you don't need to handle large amounts of crude in order to trade the oil markets.

Oil is a hugely popular commodity among traders. With supply and demand constantly in flux, volatility is never far away – and liquidity is rarely hard to find. Find out how to get started trading oil here, with a quick introduction followed by detailed instructions.

Hi-Tech General Trading llc While oil importers and exporters use futures to insure against the adverse effects of oil price volatility, traders can use them to speculate on oil without buying or selling the commodity itself

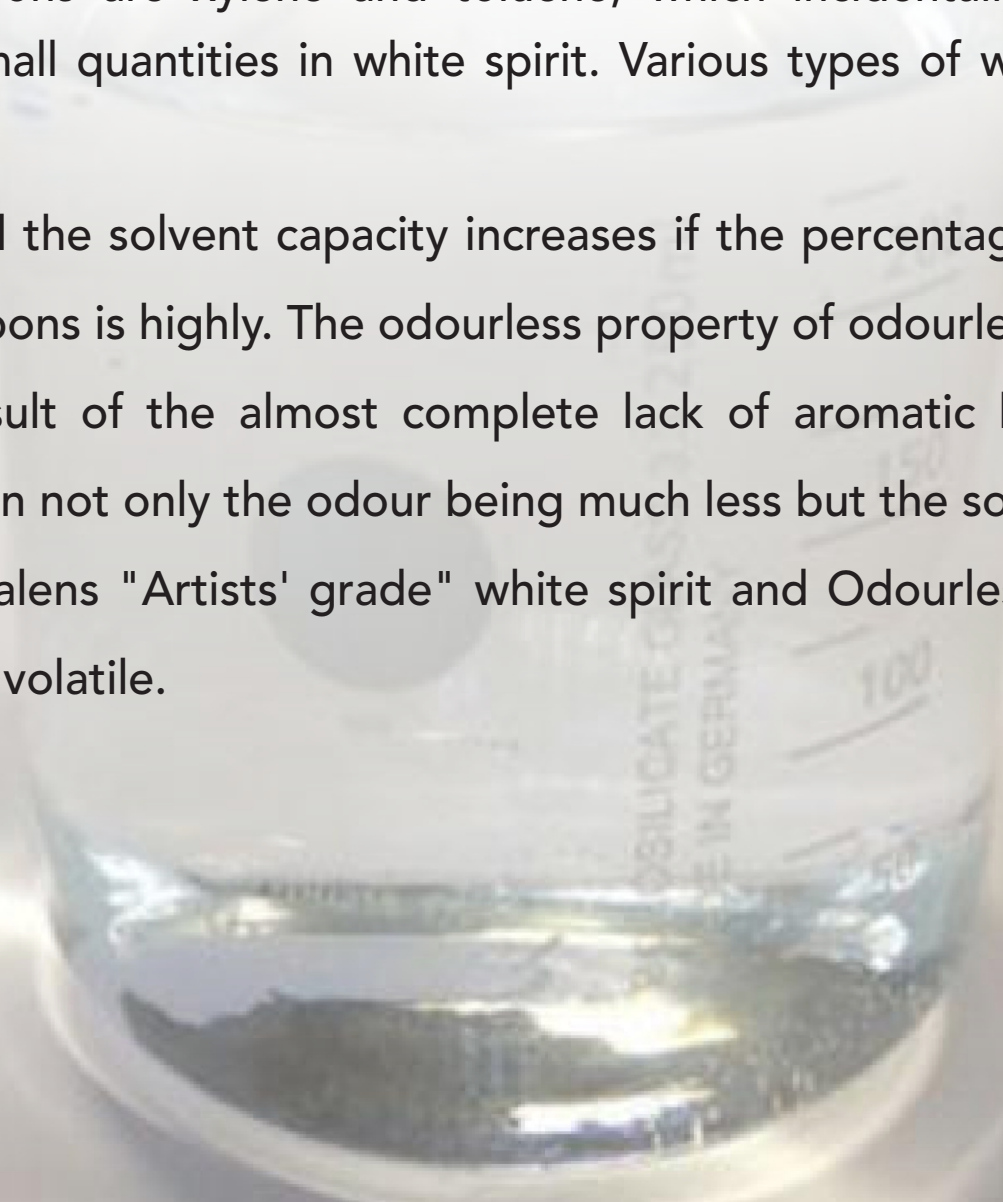

PRODUCT

WHITE SPIRIT

White spirit, as is petrol, is a petroleum distillate. The odour and capacity to act as solvent depend on the extent to which the so-called "aromatic hydrocarbons" are present in the solvent. Well-known aromatic hydrocarbons are xylene and toluene, which incidentally are present only in small quantities in white spirit. Various types of white spirit are available.

In general the solvent capacity increases if the percentage of aromatic hydrocarbons is highly. The odourless property of odourless white spirit is the result of the almost complete lack of aromatic hydrocarbons, resulting in not only the odour being much less but the solvent capacity as well. Talens "Artists' grade" white spirit and Odourless white spirit are 100% volatile.

PRODUCT

FUEL OIL

Fuel oil, also called furnace oil, fuel consisting mainly of residues from crude-oil distillation. It is used primarily for steam boilers in power plants, aboard ships, and in industrial plants. Commercial fuel oils usually are blended with other petroleum fractions to produce the desired viscosity and flash point. Flash point is usually higher than that of kerosene. The term fuel oil ordinarily does not include such fuels as kerosene.

PRODUCT

SOLVENT

Petroleum solvents readily dissolve all petroleum fractions, vegetable oils and fats, and organic compounds of sulfur, oxygen, and nitrogen. The solvent action increases with the solvent's aromatic-hydrocarbon content. All petroleum solvents poorly dissolve water (hundredths of a percent).

Aromatic solvents poorly dissolve solid paraffins, while liquid propane poorly dissolves asphaltic resinous substances. Petroleum solvents (benzene, toluene, and xylene) exhibit low toxicity and are explosive.

PRODUCT

BASE OIL

Base oil is an intermediate produced by petroleum refineries. The quality of base oil plays a critical role in deciding the quality of lubricants. Approximately 75-85 percent of the motor oil consists of base oil by volume. The rest 15-25 percent consists of additives depending on properties such as pour point, viscosity, seal compatibility, additive solubility and thermal stability.

Base oils are categorized into five different buckets — **Group I, Group II, Group III, Group IV and Group V.** The first three groups are obtained/refined from crude oil. Group IV base oils are synthetic oils (poly-alpha olefin).

PRODUCT

GAS OIL

Gas oil (also popularly known as red diesel) is the same fuel as normal road diesel but with one difference. Gas oil has been given a red marker dye so VOSA or the police can easily trace the fuel if it's being misused. This is important, given that it pays a much lower tax than the diesel you buy at the petrol station.

Gas oil is intended to be used in construction, farming, and heating. It should not be used in vehicles that use public roads. If you did use the fuel on a public road, this could possibly lead to a prison sentence or a hefty fine.

PRODUCT

NAPHTHA

Naphtha, any of various volatile, higher-flammable liquid hydrocarbon mixtures used chiefly as solvents and diluents and as raw materials for conversion to gasoline. Naphtha was the name originally applied to the more volatile kinds of petroleum issuing from the ground in the Baku district of Azerbaijan and Iran.

As early as the 1st century AD, naphtha was mentioned by the Greek writer Dioscorides and the Roman writer Pliny the Elder. Alchemists used the word principally to distinguish various mobile liquids of low boiling point, including certain ethers and esters.

PRODUCT

BITUMEN

Bitumen, also known as asphalt in the United States, is a substance that forms through the distillation of crude oil. It has waterproofing and adhesive properties. Bitumen production through distillation removes lighter crude oil components, such as gasoline and diesel, leaving the “heavier” bitumen behind.

The producer often refines it several times to improve its grade. Bitumen can also occur in nature: Deposits of naturally occurring bitumen form at the bottom of ancient lakes, where prehistoric organisms have since decayed and have been subjected to heat and pressure.

PRODUCT

General Trading

HITECH General Trading LLC - a general trading company, based in Dubai, United Arab Emirates. We deal in Food, Beverage, Stationary, Electronics and Personal Care sector. In Food, we have been trading and distributing. In Beverages, we import and distribute various general products, such as Electronics, Cosmetics, Office equipment and perishable goods.

With Continued efforts, unfaltering fundamentals and visionary approach, today we proudly emerged as one of the leading importers and distributors of in General trading sector. HITECH trades all kind of your needs and necessities for personal and professional demands.

We have developed a reputation as region's specialist in wholesale import and export of business and consumer products to clients across Middle-East.

PRODUCT

Elections

We have solid experience in the Middle East over many years of supplying election equipment & managing polling.

We supply of election materials, services, and software. We have handled equipment and software for both electronic and paper-based elections.

Hi-Tech General Trading llc manages elections and supplies voting equipment and kits, including ballot boxes, voting screens, training kits, polling kits, station kits, and election management software and devices. The company also has a division that supplies equipment to the oil and gas industry.

PRODUCT

Food Trading

Processing and Manufacturing (With Business opportunity GCC Tax Free for raw material Import and GCC tax free to our client if he imports our product to GCC Country because our product made in UAE.

We do the following when handling dry food stuff:

- fumigation • air cleaning • blanching and • size sorting
- roasting • frying

1) Nuts roasting, frying and crushing

2) Potato chips frying

3) Coffee roasting, crushing and blending

4) Rice husking, and polishing

5) Tea blending

6) Dates washing, drying, size sorting

7) Raisin and apricot washing, drying, size and double beam laser sorting
