Hitech has extensive experience and a wide range of skills.

Hitech provides the best solutions and consultations for supplying phosphate fertilizer

Hitech is characterized by its quick response in providing solutions, consultations and training for those facing problems phosphate fertilizer industry

ABOUT US

Hitech General Trading LLC is a leading global supplier of industrial equipment and materials, headquartered in Dubai, with branch offices in Baghdad and agents in several countries.

Why we are the best?

For many years, our company as an expanding engineering technical and trading company has been championing quality, reliability and flexibility and has earned an industry wide reputation for excellence with the aim of providing the most reliable, cost-effective and accurate business related solutions.

OUR PRODUCTS

Our products are Hitech General Trading Company, headquartered in the United Arab Emirates and its branch in Iraq, which is specialized in supplying phosphate fertilizer manufacturing equipment, the most important of which is increasing the concentration of phosphorus in phosphate rocks to 30%, which is a rare capability among manufacturers and is consistent with what is required in the phosphate fertilizer industry as well as in nitrogenous, organic and potash fertilizers, in addition to supplying phosphoric and sulfuric acid manufacturing equipment in addition to the phosphate fertilizer industry. Hitech also specializes in treating industrial waste. In addition, Hitech trades in a wide range of TSP, DAP, MAP, NP, NPK, and urea fertilizers, as well as organic fertilizers in their solid and liquid forms. The company also supplies sulfuric and phosphoric acid, making it a comprehensive solution for fertilizer-related needs.

PHOSPHATE FERTILIZER MANUFACTURING

Hitech Company is distinguished by supplying all types of phosphate fertilizer manufacturing equipment, starting with mining equipment, transportation and concentration, then grinding, screening, ovens and washing, then manufacturing sulphuric acid, phosphoric acid and ammonia, and ending with industrial waste treatment equipment. The most important feature of High Tech Company is that its experts are distinguished in concentrating the percentage of P_2O_5 in phosphate rocks to 30%. This expertise is not available to all phosphate fertilizer manufacturing experts, so that Hitech Company can find solutions for companies that have problems concentrating phosphate raw materials in order to enter the phosphate fertilizer industry. Below is what we can supply as equipment to manufacture all types of fertilizers, the most important of which are phosphate fertilizers.

MINING EQUIPMENT

Hitech offers a comprehensive selection of mining equipment, such as mining trucks, blast hole drills, bulldozers, drag line excavators, and high wall miners. All of these products are provided with top-notch quality.

Bulldozer

Mining Trucks

Dragline Excavator

Highwall Miner

Blasthole Drill

Bucket wheel Excavator

Wheel Tractor scrapers

UNDERGROUND MINING EQUIPMENT

Our company specializes in supplying underground mining equipment for industrial use through Hitech General Trading. Our range includes continuous miners, jumbo drills, longwall miners, and roof bolters.

Countinous Miners

Jumbo Drills

Longwall Mining Machine

Roof Bolters

BALL JAW & HAMMER MILLING EQUIPMENT

Hitech is an industry leader in supplying all types of mills including ball, jaw and hammer mills and is known for its high quality and reliable grinding machines. Our products are designed to meet the needs of various industries.

Hammer Mill

Jaw Crusher

Ball Mill

ROCK TRANSPORT

HiTech specializes in providing phosphate rock transportation solutions from mine to plant, and a variety of equipment such as loading and unloading platforms, railway stations, stackers, conveyor loading systems, dump trucks, conveyor belts and more.

Reclaimer

**Loading ,Unloading &
Train Station**

Stacker Platform

Conveyor loading

Dump Truck

Conveyor Belts

ROCK HOMOGENIZATION

Hitech specializes in supplying rock transport, homogenization, as a stacker and reclaimer equipment, in addition to crushing , screening, wet and dry dedusting system.

Scrubbing & Classification system

Rotary Scrubber

SCREENING & CRUSHING EQUIPMENT

Hitech is a leading supplier of crushing and screening equipment. Our products are designed to meet the needs of various mineral industries.

Phosphate Rock Screening

Screening Equipment

**Crusher****Screening system**

DEDUSTING & FILTRATION UNIT

We also offer custom-designed dust removal solutions to meet the specific needs of our clients' industrial operations. Our dry dust removal systems are designed to effectively capture and remove dust particles from the air, improving air quality and creating a safer work environment. Our beam filters are highly efficient at capturing and removing dust from industrial processes, while our dust removal vibrators are designed to effectively shake and dislodge dust particles from surfaces for easy removal.

**Dry Dedusting System****Beam Filter****Sludge Skimmer****Dedusting System****Dedusting Vibrator**

KILN FEEDING UNIT

Hitech offers a kiln feeding unit designed specifically for the phosphate industry. Our range includes the kiln feeder, rotary kiln, feed hopper, and various kiln parts to meet the specific needs of our customers in this industry.

Girth Gear

LINING MATERIAL

Hitech's brick lining services are essential for industries that deal with corrosive chemicals, high temperatures, and abrasive materials. By using materials such as alumina, magnesium, anti-acid, and anti-corrosive bricks, Hitech ensures that equipment and structures are protected and can withstand the harsh conditions of chemical processes.

Silica bricks

Insulating Fire Brick

SLAKING UNIT

Quicklime, often referred to as either calcium oxide (CaO) or lime, is manufactured by heating the raw ingredient 'limestone' or 'calcium carbonate' in large kilns. This process removes CO_2 that is trapped in the stone leaving behind CaO and other minor mineral constituents. This CaO molecule is what we consider to be high calcium quicklime. Quicklime as CaO is not the most useful chemical form for many applications. For applications such as water treatment, flue gas treatment, and when used as a raw ingredient to some chemical applications, the quicklime must first be slaked. Slaking occurs when quicklime is reacted with water to form Ca(OH)_2 , most commonly called hydrated lime in its dry form or lime slurry or milk of lime in its wet form.

CHEMICAL INDUSTRY EQUIPMENT

Sulphuric acid (H₂SO₄) plant equipment

This includes sulfur burners, acid coolers, absorption towers, acid pumps, acid storage tanks, and acid distribution systems. Hitech also offers services such as plant design, engineering, installation, commissioning, and maintenance to ensure that sulphuric acid plants operate efficiently and effectively. With Hitech's expertise and high-quality equipment, customers can trust that their sulphuric acid production processes will run smoothly and meet their production goals.

ORGANIC FERTILIZER

Our organic fertilizers are specially formulated to provide essential nutrients to crops and promote soil health and sustainability. Our organic fertilizers will be rich in phosphorus, nitrogen, calcium, and other nutrients and are ideal for encouraging strong root growth and overall plant growth, which improves soil structure and fertility. This is why our organic fertilizers ensure that farmers get the nutrients their crops need to grow healthy while supporting long-term soil and environmental health.

INDUSTRIAL WASTE WATER TREATMENT

Hitech Company and its experts who have been providing it for decades are distinguished by treating industrial waste resulting as a by-product of the phosphate fertilizer industry, which is summarized in supplying equipment and studies for treating waste that comes from:

1. Industrial waste resulting from the phosphate fertilizer raw material concentration unit, including liquid (basic) and solid waste resulting from the P_2O_5 concentration process in phosphate rocks, which is done through homogenization, grinding, screening and burning in rotary kilns to get rid of calcium carbonate $Ca(CO)_3$, which is converted after the burning process to CaO , which is converted by the calcination process to $Ca(OH)_2$, which is removed by grinding, washing and separation in centrifuges and is treated in the industrial waste unit.
2. Industrial waste resulting from the phosphoric acid production plant, including liquid and solid (phosphogypsum), which is one of the most important pollutants due to its large quantities and high degree of toxicity (fluorine).
3. Industrial waste as a by-product of the manufacture of various phosphate fertilizers, including liquid waste containing toxic pollutants that require treatment.
4. At the same time, Hitech and its experts are able to treat the waste resulting from fluorine salts units (aluminum fluoride, cryolite) as acidic liquid pollutants containing pollutants needed by some phosphate fertilizer manufacturers
5. Acidic materials tank and its accessories
6. Basic materials tank and its accessories

- i- Providing studies with the provision of all necessary equipment to establish and treat (slim and gypsum hopper station).
 - ii- Providing studies and providing all necessary equipment to establish (gypsum stake).
 - iii- Providing studies and providing all necessary equipment to establish (settling tank).
- Providing studies with the provision of all necessary equipment to establish a sedimentation tank to settle acidic and basic waste after the mixing process for the first and second stages.

FERTILIZER PRODUCTS

Hitech is one of the leading suppliers of fertilizers that develop agriculture, offering a wide range of products including phosphate fertilizers including (MAP, DAP, TSP, N.P and N.P.K) with the possibility of supplying UREA fertilizer .We the supply of all types of (solid and liquid organic fertilizers) and in different packages that suit the customer's request starting from 1 kg, 25 kg, 50 kg and 1.5 tons jumbo bag and according to the customer's request and from different origins.

Consulting & Training in manufacturing of raw phosphate & fertilizers

Hitech is one of the best companies that provide consultations to manufacturers of all types of fertilizers, including phosphate fertilizers, which is represented in providing consultations in the field of P_2O_5 concentration in phosphate ores by 30%, noting that its experts are distinguished in all stages of P_2O_5 concentration in phosphate ores. Hitech provides specialized consultations for the management of industrial waste resulting from the processing of phosphate ores, especially in the production of phosphoric and sulfuric acids and fertilizers, and provides optimal solutions for phosphate fertilizer manufacturers. The company specializes in supplying equipment and providing consultations in the production of various fertilizers, including MAP, DAP, TSP, N.P, N.P.K, urea, solid and liquid organic fertilizers. Through these consultations, Hitech is equipped to supply and install production lines for all types of fertilizers, supported by comprehensive studies in the fertilizer sector led by a team of highly qualified specialists from engineers, geologists and chemists. In addition, Hitech conducts extensive research for agricultural projects, assessing soil requirements for fertilizers and identifying necessary agricultural machinery, such as tractors, harvesters, seeders and sprayers, while providing production lines for agricultural equipment.

Commercial Products

Hitech offers a wide range of fertilizer products designed to meet the diverse needs of agricultural producers. Its offerings include:

1. Phosphate Fertilizers: These fertilizers are essential for promoting root growth, flowering and fruiting in plants. Hitech's phosphate products help enhance overall health and crop production. These include TSP MAP (Monoammonium Phosphate), DAP (Diammonium Phosphate), N.P.K (Nitrogen, Phosphorus, Potassium) and NP (Nitrogen and Phosphorus).

2- Urea: As one of the most widely used nitrogenous fertilizers, Hitech's urea products are highly effective in boosting nitrogen levels in the soil, leading to increased crop yields and improved plant health.

3- All types of organic fertilizers, including liquid and solid
